Applied Business Analytics Practical – IV

Roll No :- T053	Name :- Nidhi Yadav
Class :- TYIT	Batch :- 2
Date of Assignment :-04/09/2026	Date/Time of Submission :- 04/09/2026

4. Business Intelligence Tools for Data Analysis:

a. Utilize a business intelligence tool (e.g., Tableau, Power BI) to extract insights from a dataset and create interactive visualizations for effective data analysis.

A. Connect and Understand the Data

- Open Tableau and create a new workbook.
- Connect the netflix.csv file to Tableau.

STEPS:

- Open Tableau and create a new workbook.
- Connect the netflix.csv file to Tableau.

- View all the columns in the dataset.

Type	Field Name	Physical Table	Remote Field N...
Text	Show Id	NetFlix.csv	show_id
Text	Type	NetFlix.csv	type
Text	Title	NetFlix.csv	title
Text	Director	NetFlix.csv	director
Text	Cast	NetFlix.csv	cast
Text	Country	NetFlix.csv	country
Text	Date Added	NetFlix.csv	date_added
Text	Release Year	NetFlix.csv	release_year
Text	Rating	NetFlix.csv	rating

- Identify which columns contain text, numbers, and dates.

Type	Field Name	Physical Table	Remote Field N...
Text	Show Id	NetFlix.csv	show_id
Text	Type	NetFlix.csv	type
Text	Title	NetFlix.csv	title
Text	Director	NetFlix.csv	director
Text	Cast	NetFlix.csv	cast
Text	Country	NetFlix.csv	country
Text	Date Added	NetFlix.csv	date_added
Text	Release Year	NetFlix.csv	release_year
Text	Rating	NetFlix.csv	rating

Find the total number of records in the dataset.

STEPS:

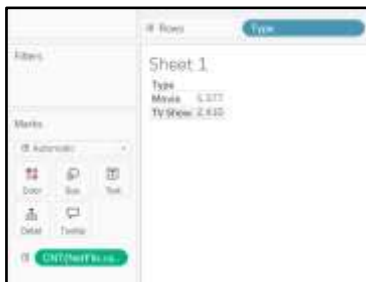

1. Drag show_id → Rows.
2. Click the show_id pill.
3. Select Measure → Count.

• Find the total number of Movies and TV Shows in the dataset.

STEPS:

1. Drag type → Columns, show_id → Rows.
2. Click show_id → Select Measure → Count.
3. Select Bar from the Marks card.
4. Turn on Show Mark Labels.

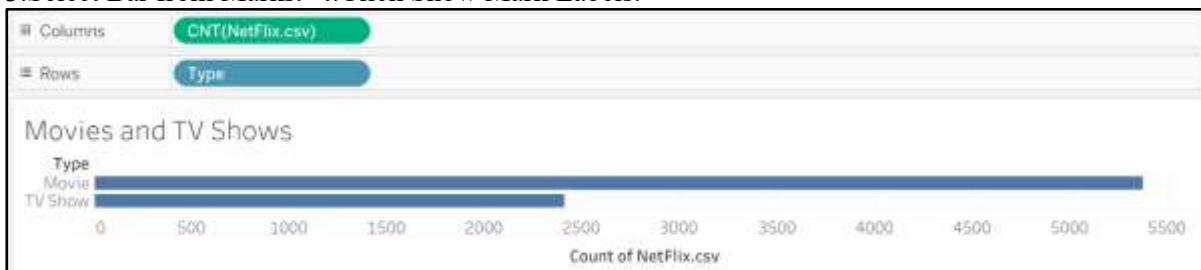

B. Create Different Visualizations

• Create a bar chart to compare the number of Movies and TV Shows.

STEPS:-

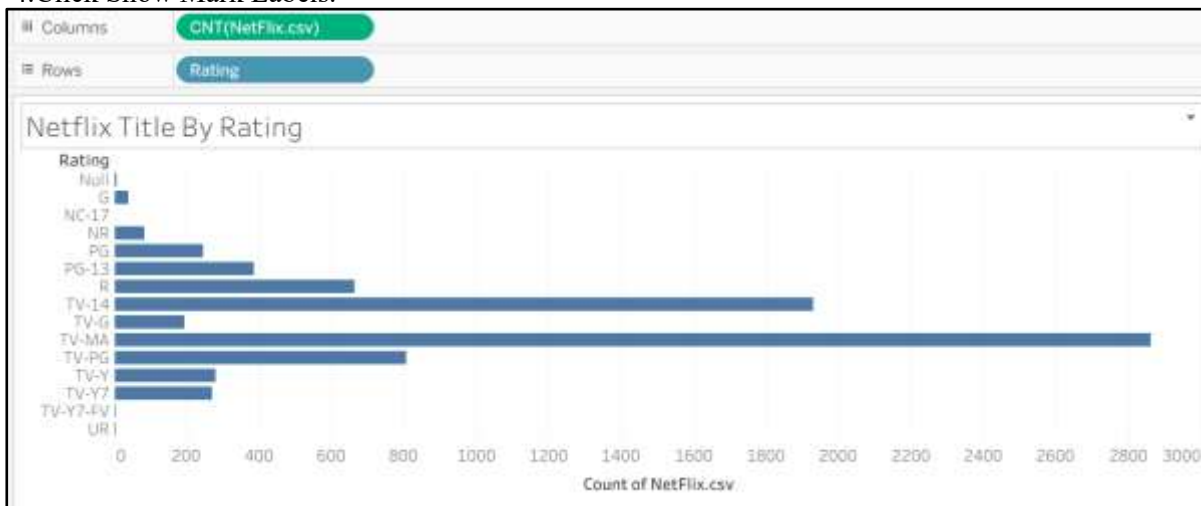

1. Drag type → Columns, show_id → Rows.
2. Click show_id → Select Measure → Count.
3. Select Bar from Marks. 4. Click Show Mark Labels.

• Create a bar chart to show the number of titles for each Rating.

STEPS:

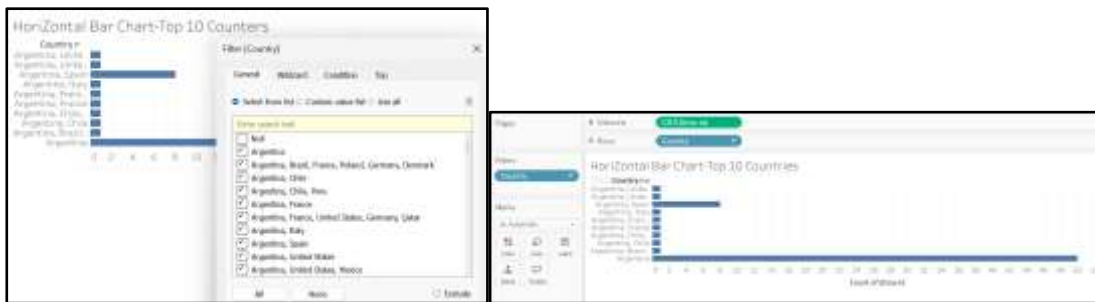

1. Drag rating → Columns, show_id → Rows.
2. Change show_id to COUNT.
3. Select Bar → Click Sort Descending.
4. Click Show Mark Labels.

• Create a horizontal bar chart to show the top 10 countries with the highest number of Netflix titles.

STEPS:

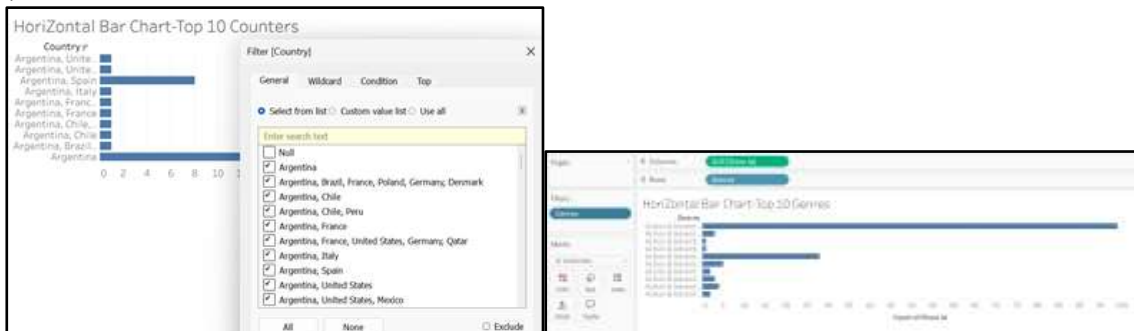

1. Drag country → Rows, show_id → Columns.
2. Change show_id to COUNT.
3. Select Bar and Click Sort Descending.
4. Right-click country → Filter.
5. Select Top By field.
6. Select: Top 10
7. Select: COUNT(show_id)

- Create a bar chart to show the top 10 Genres with the highest number of titles.

STEPS:

1. Drag genres → Rows, show_id → Columns.
2. show_id to COUNT=>Select Bar.
3. Click Sort Descending.
4. Right-click genres → Filter.
5. Select Top By field.
6. Choose Top 10 and Select COUNT(show_id).
7. Click OK.

- Create a pie chart to show the percentage of Movies and TV Shows.

STEPS:

1. On the Marks card, select Pie.
2. Drag type → Color, Drag ,show_id → Label.
3. Click the COUNT(show_id) pill on the label.
4. Select Quick Table Calculation → Percent of Total.

- Create a pie chart to show the percentage of titles for different Ratings.

STEPS:

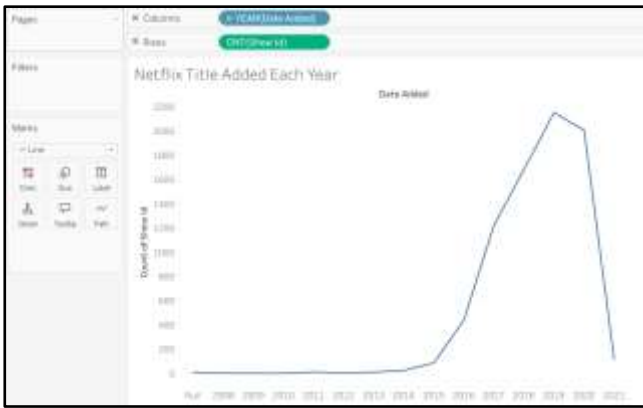

1. Select Pie from Marks.
2. Drag rating → Color.
3. Drag show_id → Label.
4. Click COUNT(show_id) on Label.
5. Select: Quick Table Calculation → Percent of Total

- Create a line chart to show the number of Netflix titles added in each year.

STEPS:

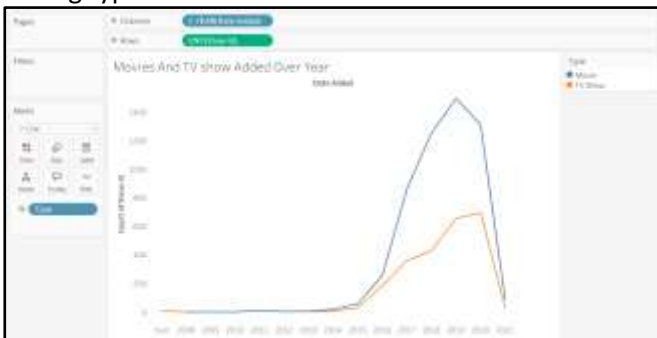

1. Drag date_added → Columns.
2. Drag show_id → Rows.
3. Change it to COUNT.
4. Select Line from Marks.

• Create a line chart to compare the number of Movies and TV Shows added over the years.

STEPS:

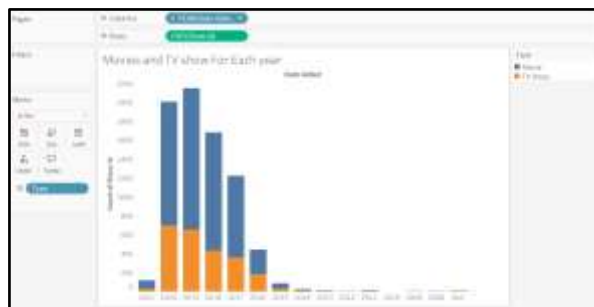

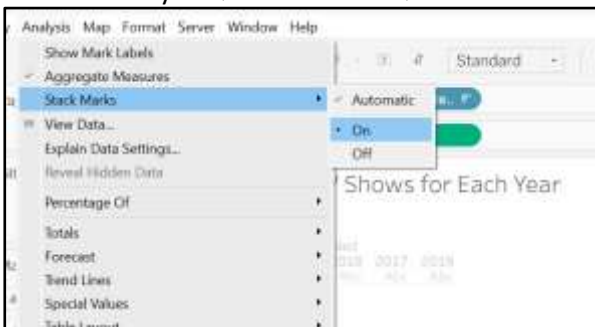

1. Drag date_added → Columns.
2. Drag show_id → Rows.
3. Change to COUNT.
4. Drag type → Color and Select Line.

• Create a stacked bar chart to compare Movies and TV Shows for each year.

STEPS:

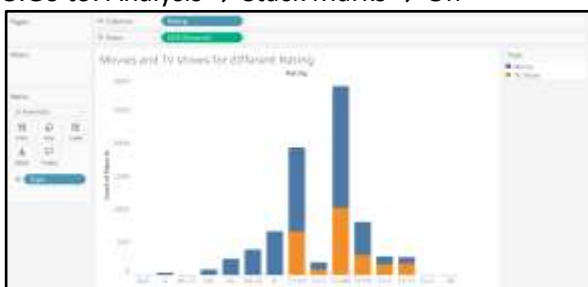

1. Drag date_added → Columns, show_id → Rows.
2. Change to COUNT.
3. Drag type → Color.
4. Select Bar from Marks.
5. Go to: Analysis → Stack Marks → On

• Create a stacked bar chart to compare Movies and TV Shows for different Ratings.

STEPS:

1. rating → Columns, show_id → Rows.
2. Change to COUNT.
3. Drag type → Color.
4. Select Bar.
5. Go to: Analysis → Stack Marks → On

• Create a map to show the countries from which Netflix titles are available.

STEPS:

1. Find country in the Data pane.
2. Right-click country.
3. Select: Geographic Role → Country/Region
4. Double-click country.
5. Tableau should automatically create a map.

• Use the map to show the number of Netflix titles for each country.

STEPS:

1. Start with your country map.
2. Drag show_id → Size.
3. Change it to COUNT.
4. Drag show_id → Color.
5. Change it to COUNT.

• Create a histogram to show the distribution of Movie durations.

STEPS:

First, filter Movies

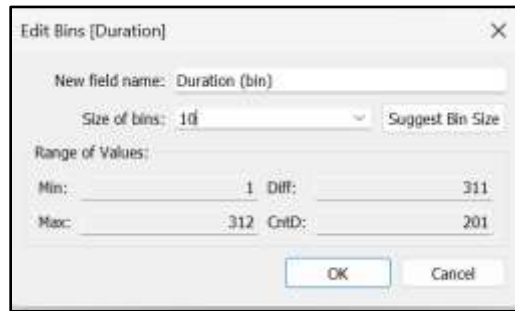

1. Drag type → Filters.
2. Select the movie. Create the histogram
3. Right-click duration in the Data pane.
4. Select: Create → Bins
5. Set Size of bins to: 10
6. Drag duration (bin) → Columns, Drag show_id → Rows.
7. Change show_id to COUNT and Select Bar.

• Change the bin size of the histogram and observe how the chart changes.

STEPS:

1. Right-click duration (bin).
2. Select Edit.
3. Change: 10 to 20 and Observe the chart.

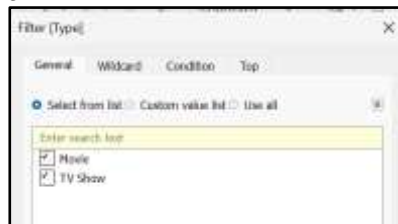

C. Apply Filters

- Add a Type filter to view only Movies or only TV Shows.

STEPS:

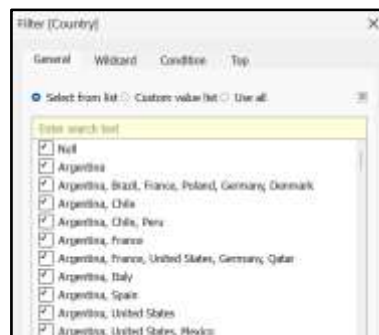

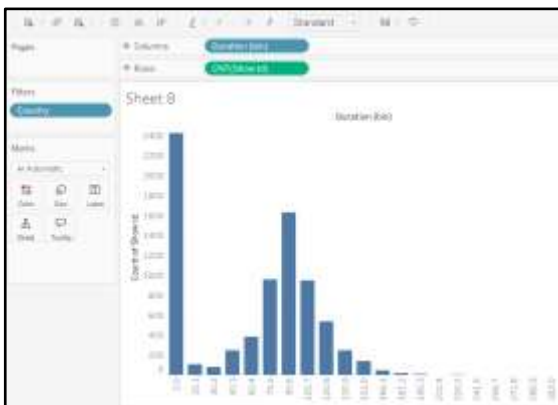

1. Drag type → Filters.
2. Select Movie and TV Show => Ok
3. Right-click type in Filters.
4. Select Show Filter => Select => Movie
5. Select Show Filter => Select => TV Show

- Add a Country filter to view titles from a selected country.

STEPS:

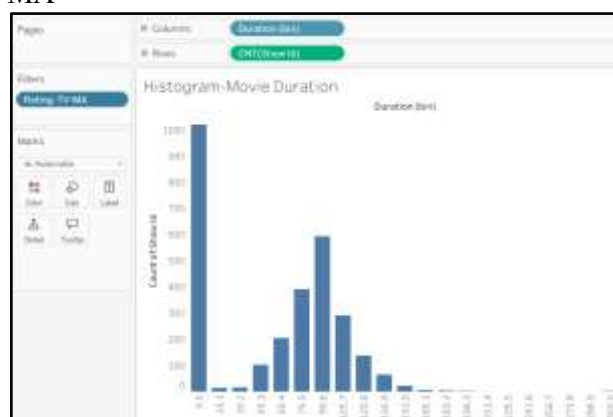

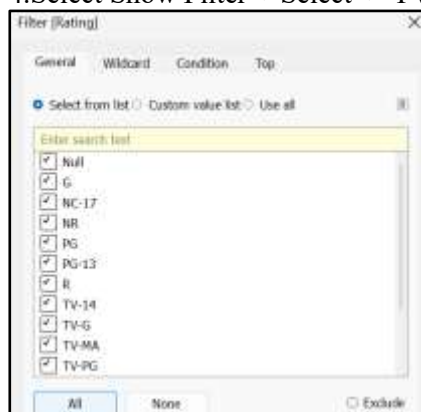

1. Drag country → Filters.
2. Select the required country => Click OK.
3. Right-click country.
4. Select Show Filter => Select => India

- Add a Rating filter to view titles with a selected Rating.

STEPS:

1. Drag rating → Filters.
2. Select the required rating => Click OK.
3. Right-click rating.
4. Select Show Filter => Select => TV-MA

- Add a Year filter to view titles from a selected year.

STEPS:

1. Drag release_year → Filters.

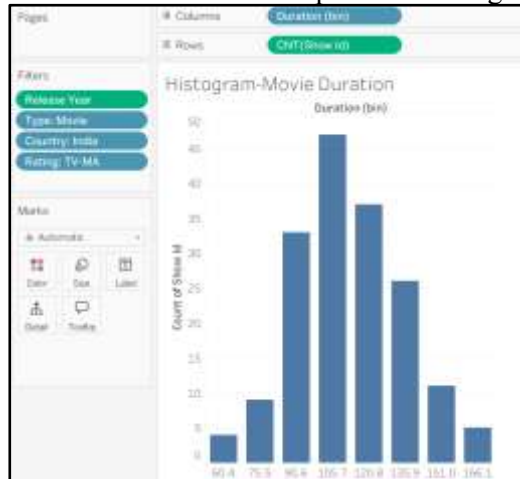

2. Select the required year=>Click OK.
3. Right-click release_year.
4. Select Show Filter=>Select=>2019

- Use two or more filters together and observe how the charts change.

STEPS:

1. Add these fields to Filters: Type = Movie
Country = India
Rating = TV-MA
Release Year = 2019
2. The visualization will update according to all selected filters.

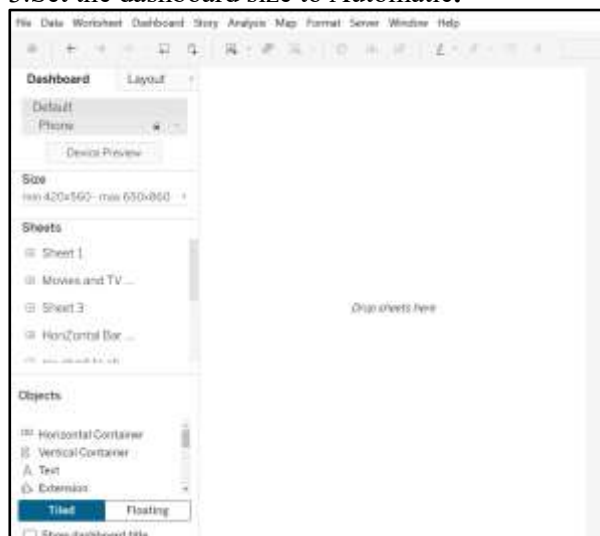

D. Create a Dashboard

- Create a new Tableau Dashboard.

STEPS:

1. Click the New Dashboard at the bottom.
2. A blank dashboard will appear.
3. Set the dashboard size to Automatic.

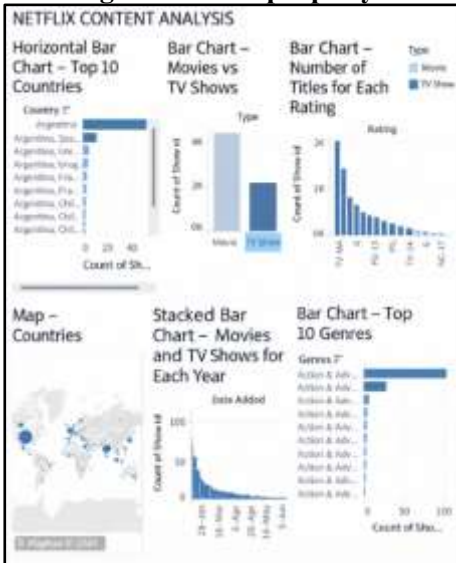

- Add the charts created in the previous steps to the dashboard.

STEPS:

From the left side, drag these worksheets onto the dashboard:

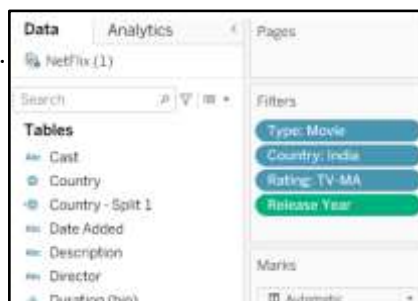

- Arrange the charts properly so that they are easy to understand.

- Add filters to make the dashboard interactive.

STEPS:

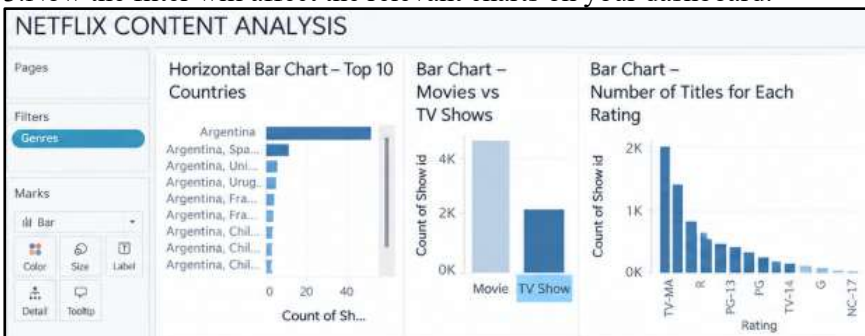

1. Select a worksheet on the dashboard.
2. Select Filters=>Select type.
3. Repeat for:
 - Country
 - Rating
 - Release Year

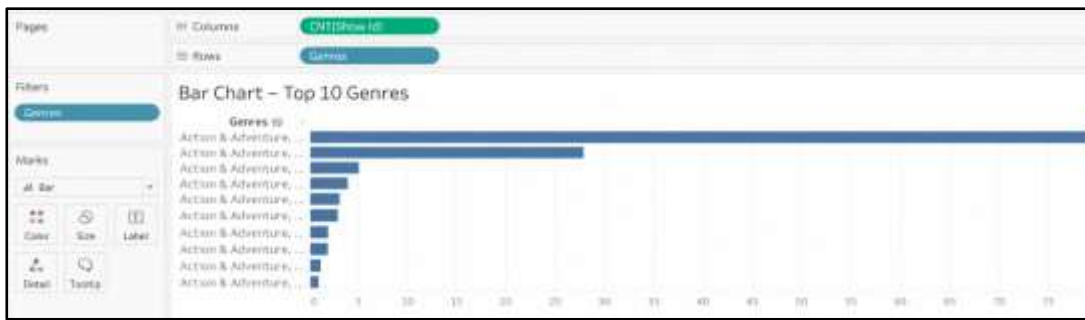

- Give a suitable title to the dashboard.

STEPS:

1. Click the filter drop-down=>Select: Apply to Worksheets
2. Select: All Using This Data Source
3. Now the filter will affect the relevant charts on your dashboard.

- Add suitable titles and labels to the charts.

- Select different filter values and observe how the dashboard changes.

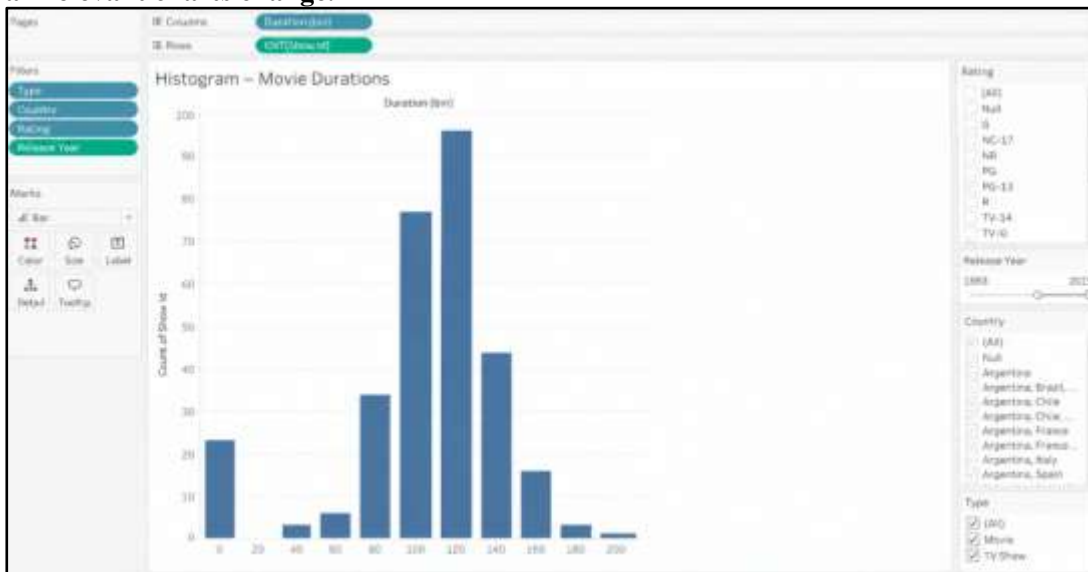

STEPS:

For Histogram=>you can give name as Movie Duration Distribution

1.Select Movie from Type and Observe the dashboard.

2.Select TV Show and Observe again.

3.Select India from Country. 4.Select TV-MA from Rating. 5.Select 2019 from Release Year and Observe how all relevant charts change.

E. Find Insights from the Data

- Which type of content is available more on Netflix: Movies or TV Shows?

Answer: Movies are available more on Netflix.

- Movies = 5,377

- TV Shows = 2,410

- Which country has the highest number of Netflix titles?

Answer: United States and Count = 3,297 titles

- Which Rating has the highest number of titles?

Answer: TV-MA and Count = 2,863 titles

- Which year had the highest number of titles added to Netflix?

Answer: 2019 and Number added = 2,153 titles

- Which Genre has the highest number of titles?

Answer: International Movies and Count = 2,437 titles

- Which Movie duration range has the highest number of Movies?

Answer: 90–99 minutes and Number of movies $\approx$ 1,193

- Write five important observations from your Tableau dashboard.

Answer:

1.Movies are more numerous than TV Shows on Netflix, with 5,377 Movies and 2,410 TV Shows. 2.The United States has the highest number of Netflix titles, with 3,297 titles. 3.TV-MA is the most common rating, with 2,863 titles. 4.2019 had the highest number of titles added to Netflix, with 2,153 titles. 5.International Movies is the genre/category with the highest number of titles, with 2,437 titles.

- Write three conclusions about Netflix content based on your analysis.

CONCLUSION 1: The analysis shows that Netflix has more Movies than TV Shows, making Movies the dominant content type in the dataset.

CONCLUSION 2: The United States contributes the largest number of Netflix titles, while TV-MA is the most common rating.

CONCLUSION 3: Tableau helps visualize Netflix content effectively through bar charts, pie charts, line charts, stacked charts, maps, histograms, filters, and interactive dashboards.
